

FUNCTIONAL	MPCN	DUTY TITLE	POSITION SUMMARY	PP-SER-GRD	SPECIAL REQUIREMENTS/CRITERIA FOR POSITION	LOCATION(S) OF POSITIONS
Financial Management	Multiple	Chief, Crypto Operations Product Support	First level supervisor, providing planning, directing, organizing, and exercising control over non-supervisory employees assigned to the Crypto Product Support Section, Financial Management Branch.	GG-0501-13	TS/SCI eligible; drug testing requirement	JBSA LACKLAND, TX
Financial Management	Multiple	Chief, Crypto Operations Compliance & Reporting	First level supervisor, providing planning, directing, organizing, and exercising control over non-supervisory employees assigned to the Operations, Compliance & Reporting Section, and Financial Management Branch.	GG-0501-13	TS/SCI eligible; drug testing requirement	JBSA LACKLAND, TX
Financial Management	Multiple	Budget Analyst	The purpose of this position is to perform a broad range of program analysis duties for Cryptologic and Cyber Systems Division (AFLCMC/HINC). The incumbent will perform in-depth analysis of budget programs, expense, and cost data; financial plan submissions; and historical organizational data in order to plan, recommend, and execute AFLCMC/HINC programs.	GG-0560-11	TS/SCI eligible; drug testing requirement	JBSA LACKLAND, TX
Non-Functionally Aligned	Multiple	Secretary (Office Automation)	To serve as principal office assistant performing various administrative and clerical duties in support of an organization normally found in a major command headquarters.	GG-0318-07	TS/SCI eligible; drug testing requirement	JBSA LACKLAND, TX
Program Management	Multiple	Program Manager	To serve as an acquisition program manager within the Cryptologic and Cyber Systems Division. To provide acquisition oversight and guidance on development, acquisition and sustainment across multiple branches, programs, activities, and diverse mission disciplines.	GG-1101-09	TS/SCI eligible; drug testing requirement	JBSA LACKLAND, TX
Program Management	Multiple	Program Manager	To serve as the first level supervisor, providing planning, directing, organizing and exercising control over non-supervisory employees. Plans, organizes, and directs the activities of procurement contracting officers and buyers, ensuring that HINC contracting support complies with legal and regulatory requirements and meets customer needs. Exercises supervisory personnel management responsibilities. Represents the contracting organization with a variety of installation and functional area organization. Performs as technical lead and unlimited contracting officer for pre and post award functions for procurements involving complex and noncomplex contracts in support of the AFLCMC mission.	GG-1101-12/113	TS/SCI eligible; drug testing requirement	JBSA LACKLAND, TX
Program Management	Multiple	Program Manager	To provide unlimited warranted contracting officer services for the electronic systems center including acquisitions planning, solicitation, proposal evaluation, negotiation, contract pre-award and post-award management activities. Oversees/executes the administration of complex contracts for procurements involving requirements for highly specialized, new, or innovative equipment and service and for other complex programs. Oversees the analysis and evaluation of cost and pricing data to determine price reasonableness when relevant historical data and pricing references are generally not available or require extensive adaptation. Cooperates with team members within the contracting area and contracts within ESC and command to provide continuing acquisition support and guidance directed toward achievement of goals and objectives.	GG-1101-113	TS/SCI eligible; drug testing requirement	JBSA LACKLAND, TX
Non-Functionally Aligned	Multiple	Technical Writer-Editor	To serve as a technical writer-editor lead with responsibility for providing technical guidance to the technical writers, researching, writing, and updating technical maintenance publications involving Technical Applications, Cryptologic and other Air Force unique systems and equipment.	GG-1083-12	TS/SCI eligible; drug testing requirement	JBSA LACKLAND, TX
Information Protection	Multiple	Security Manager	To serve as an AFLCMC/HINC supervisor security specialist to protect the enterprise from espionage, terrorism, and threats of unauthorized disclosure and/or compromise of information or material considered vital to enterprise and enterprise mission interest, national defense or national security.	GG-0080-12	TS/SCI eligible; drug testing requirement	JBSA LACKLAND, TX
Information Protection	Multiple	Security Manager	To serve as an AFLCMC/HINC supervisor security specialist to protect the enterprise from espionage, terrorism, and threats of unauthorized disclosure and/or compromise of information or material considered vital to enterprise and enterprise mission interest, national defense or national security.	GG-0080-13	TS/SCI eligible; drug testing requirement	JBSA LACKLAND, TX
Information Technology (COS)	Multiple	Network IT	IT Specialist within AFLCMC/HINI-DT, Enterprise IT and Data Transport Division; Performs Operational Support functions for Cloud One Program, ensuring operational capability and sustainment for customers. Manages customer incident/ticket resolution for environments and supported applications.	GG-2210-14	TS/SCI eligible; drug testing requirement	JBSA LACKLAND, TX
Engineering	Multiple	Supervisory Computer Engineer	Performs a broad range of offensive cyber operations capability analyses and/or engineering assignments entailing unique problems, creativity, innovative use of techniques, advanced approaches and/or new technology. Utilizes scientific inquiry in the independent development of policy, guidance, and integration initiatives to support assigned projects, studies, or problems. Provides technical guidance, advisory support, lead and assistance on projects and/or major phases for broad and varied operations as a recognized expert. Accomplishes professional development and maintains technical proficiency.	GG-0854-14	TS/SCI eligible; drug testing requirement	JBSA LACKLAND, TX
Engineering	Multiple	Supervisory Computer Scientist	The purpose of this position is to serve as supervisor to provide professional and scientific expertise in performance of work requiring knowledge and application of engineering, mathematics, statistical analysis, modeling/simulation, and/or other scientific principles, methods, and techniques. Applies multi-discipline knowledge in the planning, research, design, development, test, evaluation, integration, acquisition, dissemination, sustainment, modification, and/or exploitation of complex electronic systems to support the organization's mission objectives. Plans, organizes, and directs Engineering activities of the Program, ensuring that the Program's systems engineering complies with legal and regulatory requirements and meets customer needs. Performs a broad range of COMSEC/Cyber engineering analyses and/or engineering assignments entailing unique problems, creativity, innovative use of techniques, advanced approaches and/or new technology. Utilizes scientific inquiry in the independent development of policy, guidance, and integration initiatives to support assigned projects, studies, or problems.	GG-1550-14	TS/SCI eligible; drug testing requirement	JBSA LACKLAND, TX
Engineering	Multiple	Engineer	Provide professional and scientific expertise in performance of work requiring knowledge and application of engineering, mathematics, statistical analysis, modeling/simulation, and/or other scientific principles, methods, and techniques. Performs a broad range of (specific specialty) assignments entailing unique problems, creativity, innovative use of techniques, advanced approaches, and/or new technologies. Utilizes scientific inquiry in the independent development of mathematical models and computer programs to evaluate and predict the ability to support assigned projects, studies, or problems. Provides technical guidance, advisory support, and assistance on an entire project and/or major phases for broad and varied operations.	GG-1550-11/113	TS/SCI eligible; drug testing requirement	JBSA LACKLAND, TX
Engineering	Multiple	Engineer	Provide professional and scientific expertise in performance of work requiring knowledge and application of engineering, mathematics, statistical analysis, modeling/simulation, and/or other scientific principles, methods, and techniques. Performs a broad range of (specific specialty) assignments entailing unique problems, creativity, innovative use of techniques, advanced approaches, and/or new technologies. Utilizes scientific inquiry in the independent development of mathematical models and computer programs to evaluate and predict the ability to support assigned projects, studies, or problems. Provides technical guidance, advisory support, and assistance on an entire project and/or major phases for broad and varied operations.	GG-1550-11/113	TS/SCI eligible; drug testing requirement	JBSA LACKLAND, TX
Engineering	Multiple	Interdisciplinary S&E	Provide professional and scientific expertise in performance of work requiring knowledge and application of engineering, mathematics, statistical analysis, modeling/simulation, and/or other scientific principles, methods, and techniques. Performs a broad range of (specific specialty) assignments entailing unique problems, creativity, innovative use of techniques, advanced approaches, and/or new technologies. Utilizes scientific inquiry in the independent development of mathematical models and computer programs to evaluate and predict the ability to support assigned projects, studies, or problems. Provides technical guidance, advisory support, and assistance on an entire project and/or major phases for broad and varied operations.	GG-0801/0830/0854/0855/1515/1555-0-12	TS/SCI eligible; drug testing requirement	JBSA LACKLAND, TX
Engineering	Multiple	Interdisciplinary S&E	Provide professional and scientific expertise in performance of work requiring knowledge and application of engineering, mathematics, statistical analysis, modeling/simulation, and/or other scientific principles, methods, and techniques. Performs a broad range of (specific specialty) assignments entailing unique problems, creativity, innovative use of techniques, advanced approaches, and/or new technologies. Utilizes scientific inquiry in the independent development of mathematical models and computer programs to evaluate and predict the ability to support assigned projects, studies, or problems. Provides technical guidance, advisory support, and assistance on an entire project and/or major phases for broad and varied operations.	GG-0854/0855/1515/1550-13	TS/SCI eligible; drug testing requirement	JBSA LACKLAND, TX
Contracting	Multiple	Contracting Specialist	To provide unlimited warranted contracting officer services for the Electronic Systems Center (ESC) including acquisition planning, solicitation, proposal evaluation, negotiation, contract pre-award and post-award management activities. Performs all of these functions for highly complex, high monetary, long and short term acquisitions for major systems, logistics and operational contracting.	GG-1102-12	TS/SCI eligible; drug testing requirement	JBSA LACKLAND, TX
Contracting	Multiple	Contracting Specialist	To provide unlimited warranted contracting officer services for the Electronic Systems Center (ESC) including acquisition planning, solicitation, proposal evaluation, negotiation, contract pre-award and post-award management activities. Performs all of these functions for highly complex, high monetary, long and short term acquisitions for major systems, logistics and operational contracting.	GG-1102-13	TS/SCI eligible; drug testing requirement	JBSA LACKLAND, TX
Contracting	Multiple	Supervisory Contracting Specialist	To serve as Supervisory Procurement Analyst and first-level supervisor, providing planning, directing, organizing, and exercising control over non-supervisory personnel assigned to the Plans & Programs Branch (AFLCMC/HINCKP).	GG-1102-13	TS/SCI eligible; drug testing requirement	JBSA LACKLAND, TX
Contracting	Multiple	Contracting Specialist	To provide contract pre-/post analysis services for the Air Force Life Cycle Management Center (AFLCMC) Contracting Division (AFLCMC/HINCK) procurement areas including related equipment, weapons systems, and communicating systems.	GG-1102-07/12	TS/SCI eligible; drug testing requirement	JBSA LACKLAND, TX
Information Technology (COS)	Multiple	IT Specialist	Provide professional and scientific expertise in performance of work requiring knowledge and application of engineering, mathematics, statistical analysis, modeling/simulation, and/or other scientific principles, methods, and techniques. Performs a broad range of (specific specialty) assignments entailing unique problems, creativity, innovative use of techniques, advanced approaches, and/or new technologies. Utilizes scientific inquiry in the independent development of mathematical models and computer programs to evaluate and predict the ability to support assigned projects, studies, or problems. Provides technical guidance, advisory support, and assistance on an entire project and/or major phases for broad and varied operations.	GG-2210-13	TS/SCI eligible; drug testing requirement	JBSA LACKLAND, TX
Information Technology (COS)	Multiple	Network IT	IT Specialist within AFLCMC/HINI-DT, Enterprise IT and Data Transport Division; Performs Operational Support functions for Cloud One Program, ensuring operational capability and sustainment for customers. Manages customer incident/ticket resolution for environments and supported applications.	GG-2210-12	TS/SCI eligible; drug testing requirement	JBSA LACKLAND, TX

Non-Functionally Aligned	Multiple	Supply Technician	To provide wholesale and/or COMSEC supply operations support pertaining to specialized or unique supplies, equipment, and parts requiring unusual degrees of protection in shipment and storage, or other items that are unique to the organization's mission or are seldom handled.	GG-2005-07	TS/SCI eligible; drug testing requirement	JBSA LACKLAND, TX
Logistics	Multiple	Inventory Management Specialist	The primary purpose of this position is to serve as Cryptologic and Cyber Systems Division's (CSD) Retail Item Manager (RIM) assigned to the Logistics Branch to monitor requirements and provide customer support for the CSD wholesale supply accounts.	GG-2010-09	TS/SCI eligible; drug testing requirement	JBSA LACKLAND, TX
Logistics	Multiple	Inventory Management Specialist	To serve as an inventory management specialist for the Force Protection mission providing logistics, procurement support and maintaining officer representation services.	GG-2010-11	TS/SCI eligible; drug testing requirement	JBSA LACKLAND, TX
Logistics	Multiple	Equipment Specialist	To serve as an Equipment Specialist (ES) within the Cryptologic and Cyber Systems Division across multiple branches, programs, activities, and diverse mission disciplines. To provide technical support and establish a logistics and maintenance support services for life-cycle sustainment.	GG-1670-07	TS/SCI eligible; drug testing requirement	JBSA LACKLAND, TX
Logistics	Multiple	Equipment Specialist	To serve as an Equipment Specialist (ES) within the Cryptologic and Cyber Systems Division across multiple branches, programs, activities, and diverse mission disciplines. To provide technical support and establish a logistics and maintenance support services for life-cycle sustainment.	GG-1670-11	TS/SCI eligible; drug testing requirement	JBSA LACKLAND, TX
Logistics	Multiple	Logistics Specialist	Provides professional and scientific expertise in performance of work requiring the application of engineering, mathematics, statistical analysis, modeling/simulations, and/or other scientific principles, methods, and techniques. Applies Crypto/Cyber Electrical/Computer/Software Engineering knowledge in the planning, research, design, development, test, evaluation, integration, acquisition dissemination, sustainment, modification, and/or exploitation of complex electronics systems to support the organization's mission. Utilizes scientific inquiry in the independent development of models/simulations and /or computer programs to evaluate and predict the ability to support assigned project, studies, or problems. Provides technical guidance, advisory support, and assistance. Attends meetings, conference briefings and seminars related to programs planning, advanced technologies and support system concepts.	GG-0346-12	TS/SCI eligible; drug testing requirement	Joint Base San Antonio, TX
Logistics	Multiple	Supervisory Logistics Specialist	Provides professional and scientific expertise in performance of work requiring the application of engineering, mathematics, statistical analysis, modeling/simulations, and/or other scientific principles, methods, and techniques. Applies Crypto/Cyber Electrical/Computer/Software Engineering knowledge in the planning, research, design, development, test, evaluation, integration, acquisition dissemination, sustainment, modification, and/or exploitation of complex electronics systems to support the organization's mission. Utilizes scientific inquiry in the independent development of models/simulations and /or computer programs to evaluate and predict the ability to support assigned project, studies, or problems. Provides technical guidance, advisory support, and assistance. Attends meetings, conference briefings and seminars related to programs planning, advanced technologies and support system concepts.	GG-0346-12	TS/SCI eligible; drug testing requirement	Joint Base San Antonio, TX
Logistics	Multiple	Supervisory Logistics Specialist	Plans, organizes, and directs the activities of Product Support Management, ensuring that logistics management complies with legal and regulatory requirements and meets customer needs. Represents AF/CMC/FMC product support manager (PSM) with a variety of installation and functional area organizations. Oversees the activities of a LCL Integrated product team (IPT) for product support execution. Exercises supervisory personnel management responsibilities.	GG-0346-13	TS/SCI eligible; drug testing requirement	Joint Base San Antonio, TX
Logistics	1	Logistics Specialist	Provides professional and scientific expertise in performance of work requiring the application of engineering, mathematics, statistical analysis, modeling/simulations, and/or other scientific principles, methods, and techniques. Applies Crypto/Cyber Electrical/Computer/Software Engineering knowledge in the planning, research, design, development, test, evaluation, integration, acquisition dissemination, sustainment, modification, and/or exploitation of complex electronics systems to support the organization's mission. Utilizes scientific inquiry in the independent development of models/simulations and /or computer programs to evaluate and predict the ability to support assigned project, studies, or problems. Provides technical guidance, advisory support, and assistance. Attends meetings, conference briefings and seminars related to programs planning, advanced technologies and support system concepts.	GS-0346-12	TS/SCI eligible; drug testing requirement	HANSCOM AFB, MA
Logistics	1	Logistics	Provides professional and scientific expertise in performance of work requiring the application of engineering, mathematics, statistical analysis, modeling/simulations, and/or other scientific principles, methods, and techniques. Applies Crypto/Cyber Electrical/Computer/Software Engineering knowledge in the planning, research, design, development, test, evaluation, integration, acquisition dissemination, sustainment, modification, and/or exploitation of complex electronics systems to support the organization's mission. Utilizes scientific inquiry in the independent development of models/simulations and /or computer programs to evaluate and predict the ability to support assigned project, studies, or problems. Provides technical guidance, advisory support, and assistance. Attends meetings, conference briefings and seminars related to programs planning, advanced technologies and support system concepts.	GS-0346-12	Must be able to obtain Secret Clearance	HANSCOM AFB, MA

Program Management	1	SAP IT Networks and Services Program Manager	Provide professional and scientific expertise in performance of work requiring knowledge and application of engineering, mathematics, statistical analysis, modeling/simulation, and/or other scientific principles, methods, and techniques. Performs a broad range of (specific specialty) assignments entailing unique problems, creativity, innovative use of techniques, advanced approaches, and/or new technologies. Utilizes scientific inquiry in the independent development of mathematical models and computer programs to evaluate and predict the ability to support assigned projects, studies, or problems. Provides technical guidance, advisory support, and assistance on an entire project and/or major phases for broad and varied operations.	GS-1101-12	Telework eligibility: EMPLOYEE ELIGIBLE FOR SITUATIONAL TELEWORK ONLY, INCLUDING EMERGENCY AND OPM PRESCRIBED "UNSCHEDULED TELEWORK". OGE-450 Required: Incumbent may be required to file an OGE Form 450, Confidential Financial Disclosure Report, upon appointment and will be required to file annually. Any Specialized Experience: Prior DAF Enterprise IT experience or commercial IT knowledge/experience preferred. Travel Requirements: Travel may be required up to 10% of the time.	WRIGHT PATTERSON AFB, OH
Program Management	1	Program Manager	Serves as the focal point for planning, management, and coordination of life cycle logistics support for assigned systems, programs, and equipment. Prepares, manages, monitors, evaluates, and coordinates Life Cycle Management Plan and Life Cycle verification plan implementation. Serves as the senior technical advisor on documentation requirements. Serves as the senior representative and spokesperson in communication program matters.	GS-1101-12	Must be able to obtain Secret Clearance	HANSCOM AFB, MA
Program Management	1	Program Manager	To serve as a security specialist, providing information, industrial, information assurance, acquisition, physical and personnel security program functions in support of the National Level Secretary of the Air Force (SAF) and other AFMC classified security programs. Implements and administers the information security program for the organization. Implements and administers the physical security program. Describes policy and procedures and provides advice and assistance concerning personnel security matters within the organization. Assists security managers in implementing security education motivation programs.	GS-1101-12/T13	Must be TS/SCI Eligible.	HANSCOM AFB, MA
Program Management	1	Advanced Aerial Communications Technology Program Manager	Plans, organizes, and directs the activities with responsibility for the development of major aspects of key Air Force cyber programs of national significance and/or essential operating programs. Exercises supervisory personnel management responsibilities. Directs coordinates and oversees work through subordinate supervisors. Represents the program office at high level within the organization and with contractor organizations. Develops, implements and controls contractual, financial and technical aspects of defensive cyber programs through designated phases of the acquisition cycle for which no closely related precedents exist. Makes periodic and comprehensive assessment and evaluation of program goals, and objectives which will provide a basis for long-range planning to enhance the organization's management capabilities.	GS-1101-13	Must be TS/SCI Eligible Incumbent may be required to file an OGE Form 450, Confidential Financial Disclosure Report, upon appointment and will be required to file annually.	HANSCOM AFB, MA
Program Management	1	Foreign Military Sales Communication Program Manager	Implements program management principles on assigned projects/programs including cost estimates, schedules, and performance supportability baseline requirements by applying known methods and procedures. Plans, organizes, coordinates, and assess activities of functional specialist including contracting, engineering, manufacturing, program control, configuration/data management, test, and logistics. Reviews and directs the progress of contracts in meeting program objectives. Prepares and presents staff studies for presentation to the Program Director and other management officials.	GS-1101-13	Must be TS/SCI Eligible Foreign and domestic travel to support FMS cases	HANSCOM AFB, MA
Program Management	1	Program Manager Secure Voice and Desktop Services	Provide professional and scientific expertise in performance of work requiring knowledge and application of engineering, mathematics, statistical analysis, modeling/simulation and/or other scientific principles. Performs a broad range of Crypto/Cyber or software engineering assignments entailing unique problems, creativity, innovation use of techniques advanced approaches. Utilizes scientific inquiry in the independent development of mathematical models and computer programs to evaluate and predict the ability to support assigned projects, studies, or problems. Provides technical guidance, advisory support, and assistance on an entire project and/or major phases for broad and varied operations. Attends meetings, conferences, briefing, and seminars related to program planning, advanced technologies, and support system concepts. Accomplishes professional development and maintains technical proficiency.	GS-1101-13	TS/SCI Required. Prior DAF Enterprise IT experience or commercial IT knowledge/experience preferred. Situational telework only. Position not eligible for regular and recurring telework.	WRIGHT PATTERSON AFB, OH
Program Management	1	A17 Program Manager	Provides a broad range of Crypto/Cyber or Software Engineering assignments entailing unique problems, creativity, innovative use of techniques, advance approaches and/or new technologies. Utilizes scientific inquiry in the independent development of mathematical models and computer programs to evaluate and predict the ability to support assigned projects, studies, or problems. Provides technical guidance, advisory support, and assistance on an entire project and/or major phases for broad and varied operations. Attends meetings, conferences, briefing, and seminars related to program planning, advanced technologies, and support system concepts. Accomplishes professional development and maintains technical proficiency.	GS-1101-13	TS/SCI Required. Prior DAF Enterprise IT experience or commercial IT knowledge/experience preferred. Situational telework only. Position not eligible for regular and recurring telework.	WRIGHT PATTERSON AFB, OH
Program Management	1	SETTas Program Manager	Performs a broad range of software cyber operations capability analyses and/or engineering assignments entailing unique problems, creativity, innovative use of techniques, advance approaches and/or new technologies. Utilizes scientific inquiry in the independent development of policy, guidance, and integration initiatives to support assigned projects, studies, or problems. Provides technical guidance, advisory support, lead and maintains progress and/or major phases for broad and varied operations as a recognized expert. Accomplishes professional development and maintains technical proficiency.	GS-1101-13	TS/SCI Required. Prior DAF Enterprise IT experience or commercial IT knowledge/experience preferred. Situational telework only. Position not eligible for regular and recurring telework.	WRIGHT PATTERSON AFB, OH
Program Management	1	Program Manager	Responsible for planning, programming, scheduling, budgeting, evaluation of cost and schedule performance status-management reporting, reprogramming, and other financial management functions. Analyzes budgetary requirements and prepares budgets. Provides advice and guidance to program managers on the interpretation of budget policy. Translates raw requirements data submitted by program managers into comprehensive resource exhibits/narratives for timely submission in planning, programming and budgeting systems (PPBS).	GS-1101-13	Must be able to obtain Secret Clearance	WRIGHT PATTERSON AFB, OH
Program Management	1	Program Manager	Operations Research Analyst trainee leading through the GG-07 grade to a target position of Operations Research Analyst, GG-1515-12. The employee participates in the preparation of cost estimates, cost models, analyses, reviews and studies for weapon systems, groups of systems or broad problems relating to business decision analysis and other decision analysis projects. In a developmental capacity, works closely with senior Operations Research Analysts in using rigorous methods of logic and scientific discipline to design, develop and adapt mathematical cost models that will be used to evaluate the cost of various weapons systems and programs. In a developmental capacity, assists in performing a broad range of weapons systems cost estimating and economic analysis assignments developing methodologies for evaluating the cost effectiveness of advanced weapons systems, related equipment, and force structures. In a developmental capacity, performs a variety of cost estimating / analysis tasks for weapons system studies of limited scope and difficulty.	GS-1101-13	Must be TS/SCI Eligible.	HANSCOM AFB, MA
Program Management	1	Program Manager	Serves as expert planner, analyst and advisor for data management. Serves as technical advisor to management, responsible for evaluating and providing recommendations of new database technologies and architectures and/or developing and administering data standards, policies, and procedures. Responsible for the design, development, installation, test, implementation, modification, documentation and follow up maintenance of systems. Performs in-depth analysis. This involves determining a need or responding to a stated need, identifying and evaluating available system software (if any) or guiding the writing of the software and monitoring other systems software programmers or contractor personnel in performance of test, implementation, modification, documentation and follow-up maintenance. Serves as technical expert performing analysis of automated and manual systems to accomplish design and programming assignment.	GS-1101-13	Must be TS/SCI Eligible.	JBSA LACKLAND, TX
Program Management	1	Program Manager	Serves as senior IT subject matter expert for the Air Force Life Cycle Management Center (AFLCMC) and leads the cybersecurity program implementation for multiple Air Force (AF) Defense Business Systems (DBS) acquisition and/or information technology (IT) programs. Employs advanced IT security expertise and knowledge to implement a comprehensive, integrated cybersecurity program, achieving and preserving confidentiality, integrity, and availability (CIA) risk, across multiple AF enterprise-level business IT programs managed within the PEO.	GS-1101-13	Must be TS/SCI Eligible.	HANSCOM AFB, MA
Contracting	1	Contract Specialist		GS-1102-12	Must be able to obtain Secret Clearance	MAXWELL GUNTER, AL

Engineering	1	Engineer		GS-1550-13	Must be able to obtain Secret Clearance	HANSCOM AFB, MA
Information Technology (COS)	1	Network IT	Provide networking and systems engineering expertise and technical support	GS-2210-11	Must be TS/SCI Eligible.	HANSCOM AFB, MA
Information Technology (COS)	1	Network IT	In this position you will be responsible for planning, executing and managing an annual budget over \$48 billion dollars, assisting program managers with acquiring our nation's most sophisticated weapon systems. A financial manager's specific duties may include estimating project costs, long-range budget forecasting, analyzing current budget execution, and tracking the financial health of each project as it progresses through to completion. The career field consists of budget analysts, financial managers and cost estimators - mostly civilians - serving the United States by acquiring aircraft, cyber, and armament weapon systems. Put your business and analytical skills to use while protecting our nation!	GS-2210-11	Must be TS/SCI Eligible.	WRIGHT PATTERSON AFB, OH
Information Technology (COS)	1	Network IT	In this position you will be responsible for leading, developing, and assessing cost and schedule estimates, assisting program managers with acquiring our nation's most sophisticated weapon systems. A cost estimator's specific duties may include estimating program costs, forecasting long-range budgets, preparing analyses of alternatives and what-if drbls, and evaluating proposed contract costs. The career field consists of budget analysts, financial managers, and cost estimators - mostly civilians - serving the US Air Force by acquiring aircraft, cyber, and armament weapon systems. Put your business and analytical skills to use while protecting our nation!	GS-2210-11	Must be TS/SCI Eligible.	MAXWELL GUNTER, AL
Information Technology (COS)	1	Network IT	Serve as the technical expert for multiple specialized information protection and acquisition security programs supporting major DoD, USAF, other Federal Agencies and Foreign Government Research, Development, Test and Evaluation (RD&E) classified and highly sensitive defense acquisition and intelligence programs. This position is assigned to AFLCMC/EGC - Cyber Resiliency Office for Weapons Systems (CROWS). The incumbent will be part of a larger Cyber Focus Team supporting a major AFLCMC Program Executive Office. Will administer the Program Protection Planning efforts. Identifies and validates mission security needs through evaluation or development of security elements of applicable program. Plans/organizes/and directs the security activities of assigned programs at contractor and government locations ensuring that all elements of protection complies with legal and regulatory requirements and meets customer needs throughout the program. Administers the physical, information, industrial, personnel, and operations security programs as applied to assigned activities/systems.	GS-2210-11	Must be TS/SCI Eligible.	MAXWELL GUNTER, AL
Information Technology (COS)	1	Network IT	AFLCMC Life Cycle Logistics Management Specialist career field responsibilities span the entire system life cycles from requirements generation through retirement, reclamation, demilitarization or material disposition. Encompassing both acquisition and sustainment responsibilities, the career field includes logistics professionals responsible for planning, developing, implementing, and managing effective and affordable weapons, material, or information systems' product support strategies. The goals of a "Loggie" are to meet and exceed Product Support Strategies and Goals for system operational effectiveness and readiness. This is done by managing 12 Integrated Product Support (IPS) Elements: (1) Product Support Management; (2) Supply Support; (3) Packaging, Handling, Storage & Transportation (PH&T); (4) Maintenance Planning & Management; (5) Design Interface; (6) Sustainment Engineering; (7) Technical Data (TD); (8) Information Technology (IT) System Continuous Support; (9) Facilities & Infrastructure; (10), Manpower & Personnel; (11) Support Equipment; and (12) Training & Training Support. As you can tell, the skillsets required for these types of positions are varied. We are constantly looking for new talent from varied backgrounds.	GS-2210-11	Must be TS/SCI Eligible.	HANSCOM AFB, MA
