

AFLCMC... Providing What the Warfighter Needs When They Need It

PEO Training
03 December 2025

Mr. Rodney Stevens, SES
Program Executive Officer, Training

Col Ricardo Jaime
Senior Materiel Leader, Advanced Training Capabilities

Col Nicholas Feranec
Senior Materiel Leader, Simulators

Acquisition Philosophy

AFLCMC... Providing What the Warfighter Needs When They Need It

AIR DOMINANCE BEGINS HERE...

"We believe that our people are, and will continue to be, our nation's key competitive advantage. We are working to train our airmen and guardians to confront the brutal challenges that warfare without sanctuary presents. We are emphasizing readiness...."

Troy E. Meink, SecAF

Acquisition By the Numbers

AFLCMC... Providing What the Warfighter Needs When They Need It

TRAINING ACQUISITIONS REPRESENT A BROAD LANDSCAPE OF DIFFERENT TYPES OF "THINGS..."

Mission: Develop, deliver, and sustain integrated training capabilities to enable war-winning airpower.
Vision: To be the trusted provider of adaptive and innovative training capabilities - on target, every time.

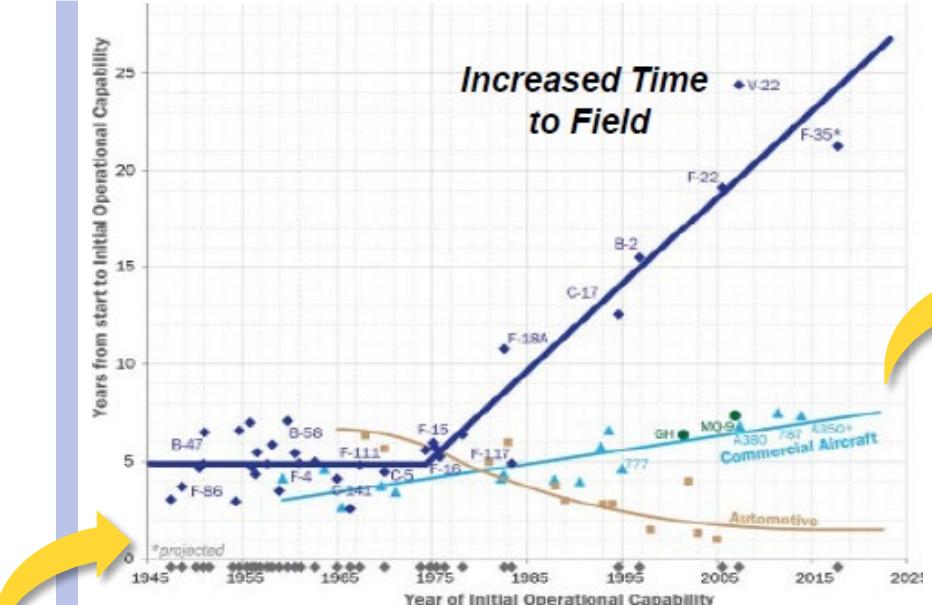

The Challenge We Have

AFLCMC... Providing What the Warfighter Needs When They Need It

Congress uses the PPBE process to hold the DoW accountable...

...This has driven the USAF to Platform-centric thinking

We need a new way of harnessing Acquisition Physics to deliver integrated capability at pace and scale required to maintain military superiority.

The Character of War

AFLCMC... Providing What the Warfighter Needs When They Need It

The character of war is evolving...

WHAT ARE WE GOING TO DO?

An "Operations" culture within the Department of the Air Force
Alignment with the Defense Industrial Base (DIB)

HOW ARE WE GOING TO DO IT?

Mindset shift for Acquisition Strategies

Culture Drives Results

AFLCMC... Providing What the Warfighter Needs When They Need It

**SOLVE THE OPERATIONAL
PROBLEM FROM FORCE DESIGN**

OPERATIONAL SOLUTIONS

**Acquisition MUST be more
than just a business deal –
it's about Mission outcomes.**

**"SHARPENING THE
WARFIGHTER'S BITE"**

**"DELIVERING THE
SKILL TO KILL"**

Simulators Problem Statement

AFLCMC... Providing What the Warfighter Needs When They Need It

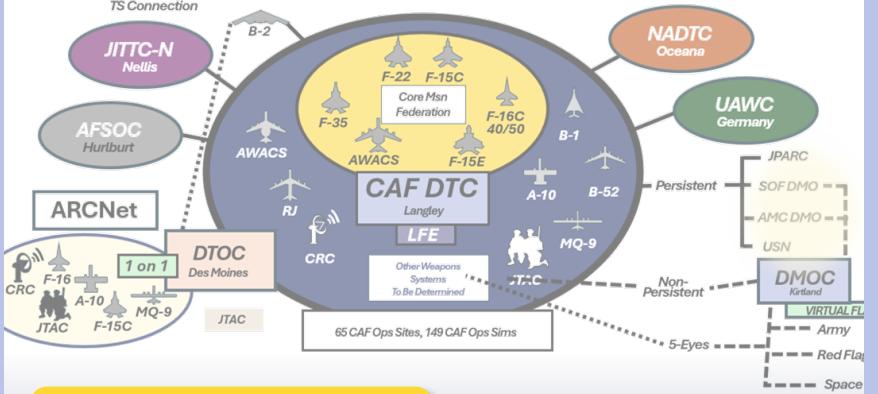

CONCURRENCY

"To maximize the effectiveness of synthetic training, simulators systems must be concurrent with their respective MWS, weapons, and stores."

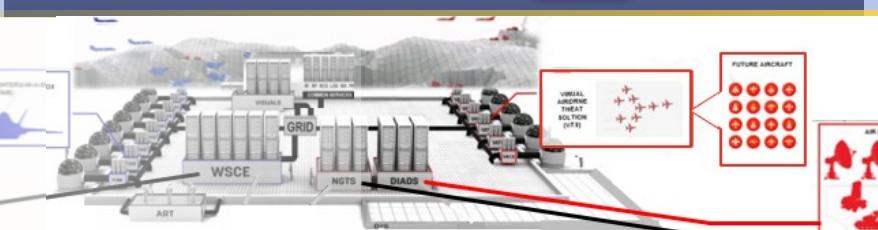

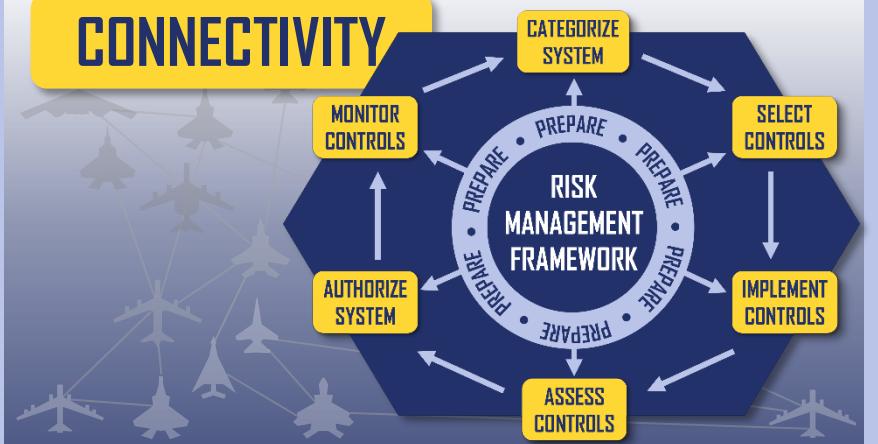

- Lt Gen Scott L. Pleus
Acting Vice Chief of Staff, USAF

The CAF DMO Network (DMON)

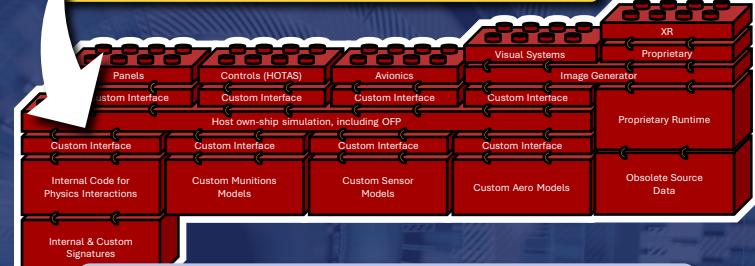

CONNECTIVITY

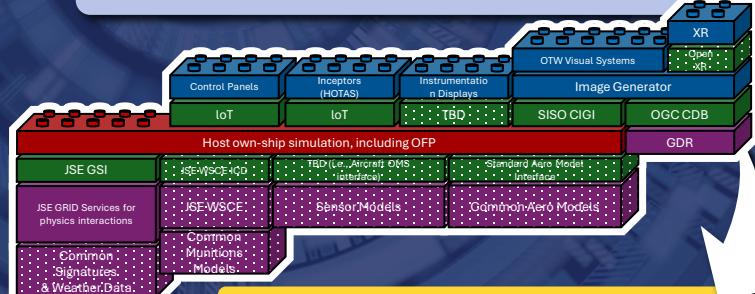

Current simulator unique & proprietary architecture interfaces drive high long-term sustainment costs.

BEFORE Applying MOSA via SCARS Standards

ENTERPRISE INTEGRATION

AFTER Applying MOSA via SCARS Standards

MOSA allows for competition & reusable components/data, driving lower long-term sustainment costs.

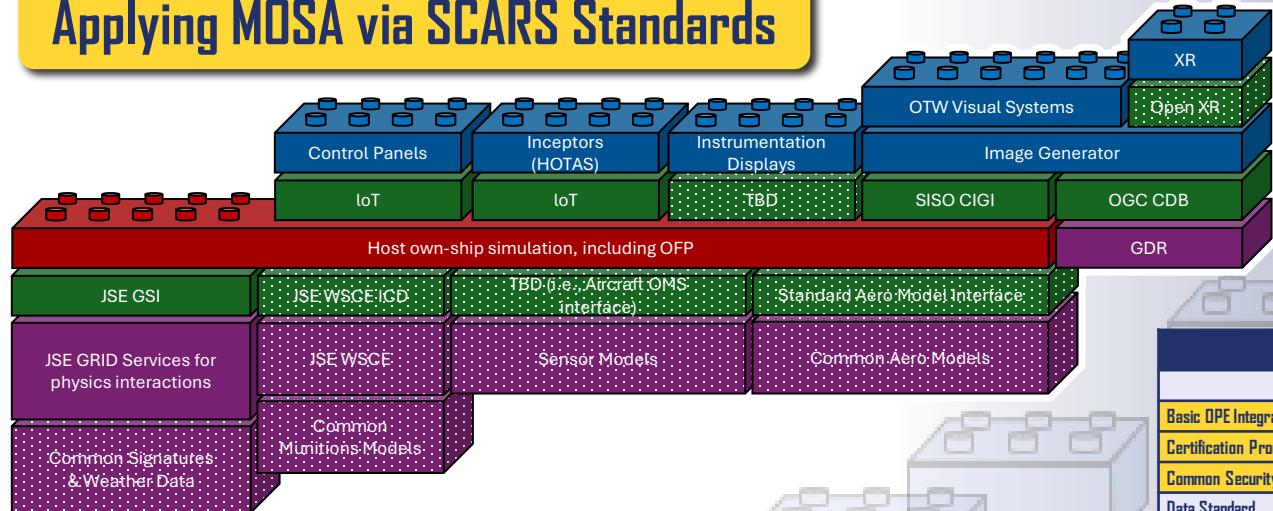

- Simulator Modular Human Interface Components
- Standard Interfaces and Data Formats
- Core Simulation
- Reusable Code and Components from SCARS Library
- To Be/Future Development

SCARS Standards

AFLCMC... Providing What the Warfighter Needs When They Need It

Applying MOSA via SCARS Standards

MOSA allows for competition & reusable components/data, driving lower long-term sustainment costs.

- Simulator Modular Human Interface Components
- Standard Interfaces and Data Formats
- Core Simulation
- Reusable Code and Components from SCARS Library
- To Be/Future Development

SCARS STANDARDS ROADMAP

Platform Program Office responsible for prioritizing integration of SCARS Standards into platform sustainment plan. SCARS Integration IPT provides support and coordination for implementation.

SCARS Lines of Effort

AFLCMC... Providing What the Warfighter Needs When They Need It

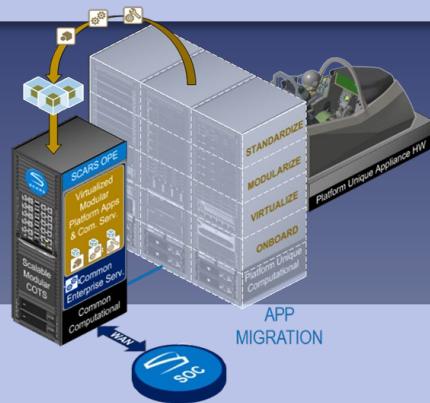

LoE 1: EFFICIENT CYBERSECURITY

- Centralized cyber-maintenance for vulnerability scans, patches, & enterprise-wide RMF controls
- Enterprise view of cybersecurity posture across training systems
- Compliance with cybersecurity policy

WARFIGHTER BENEFIT: Significantly reduced trainings system down time for maintenance and faster ATDs

LoE 2: COMMON ARCHITECTURE

- Design/implementation of MOSA & common modeling & interfaces
- Defining reference architecture
- Maximizing virtualization & cloud-based hosting
- Break hardware & vendor specific dependency

WARFIGHTER BENEFIT: Reliability improved, minimized maintenance, & reduced cost of functional improvements

LoE 3: STANDARD APPLICATIONS

- Common infrastructure for application hosting
- Eliminate duplicate costs of applications/models/data - "Develop Once, Make Available to All"
- Improve realism & provide common training experience across different platforms

WARFIGHTER BENEFIT: Application re-use across platforms and consistent performance enhances "fair fight"

Lines of Effort - Roadmap

INDUSTRY HELP

- Apply modular architectures for hardware and software
- Avoid proprietary interfaces
- Share innovative products, solution, technologies, and ideas with WNR
- Licensing methods that do not require connection to internet or hardware keys/dongles
- OEM product support must include patched/updates in response to identification of cybersecurity vulnerabilities

FY28

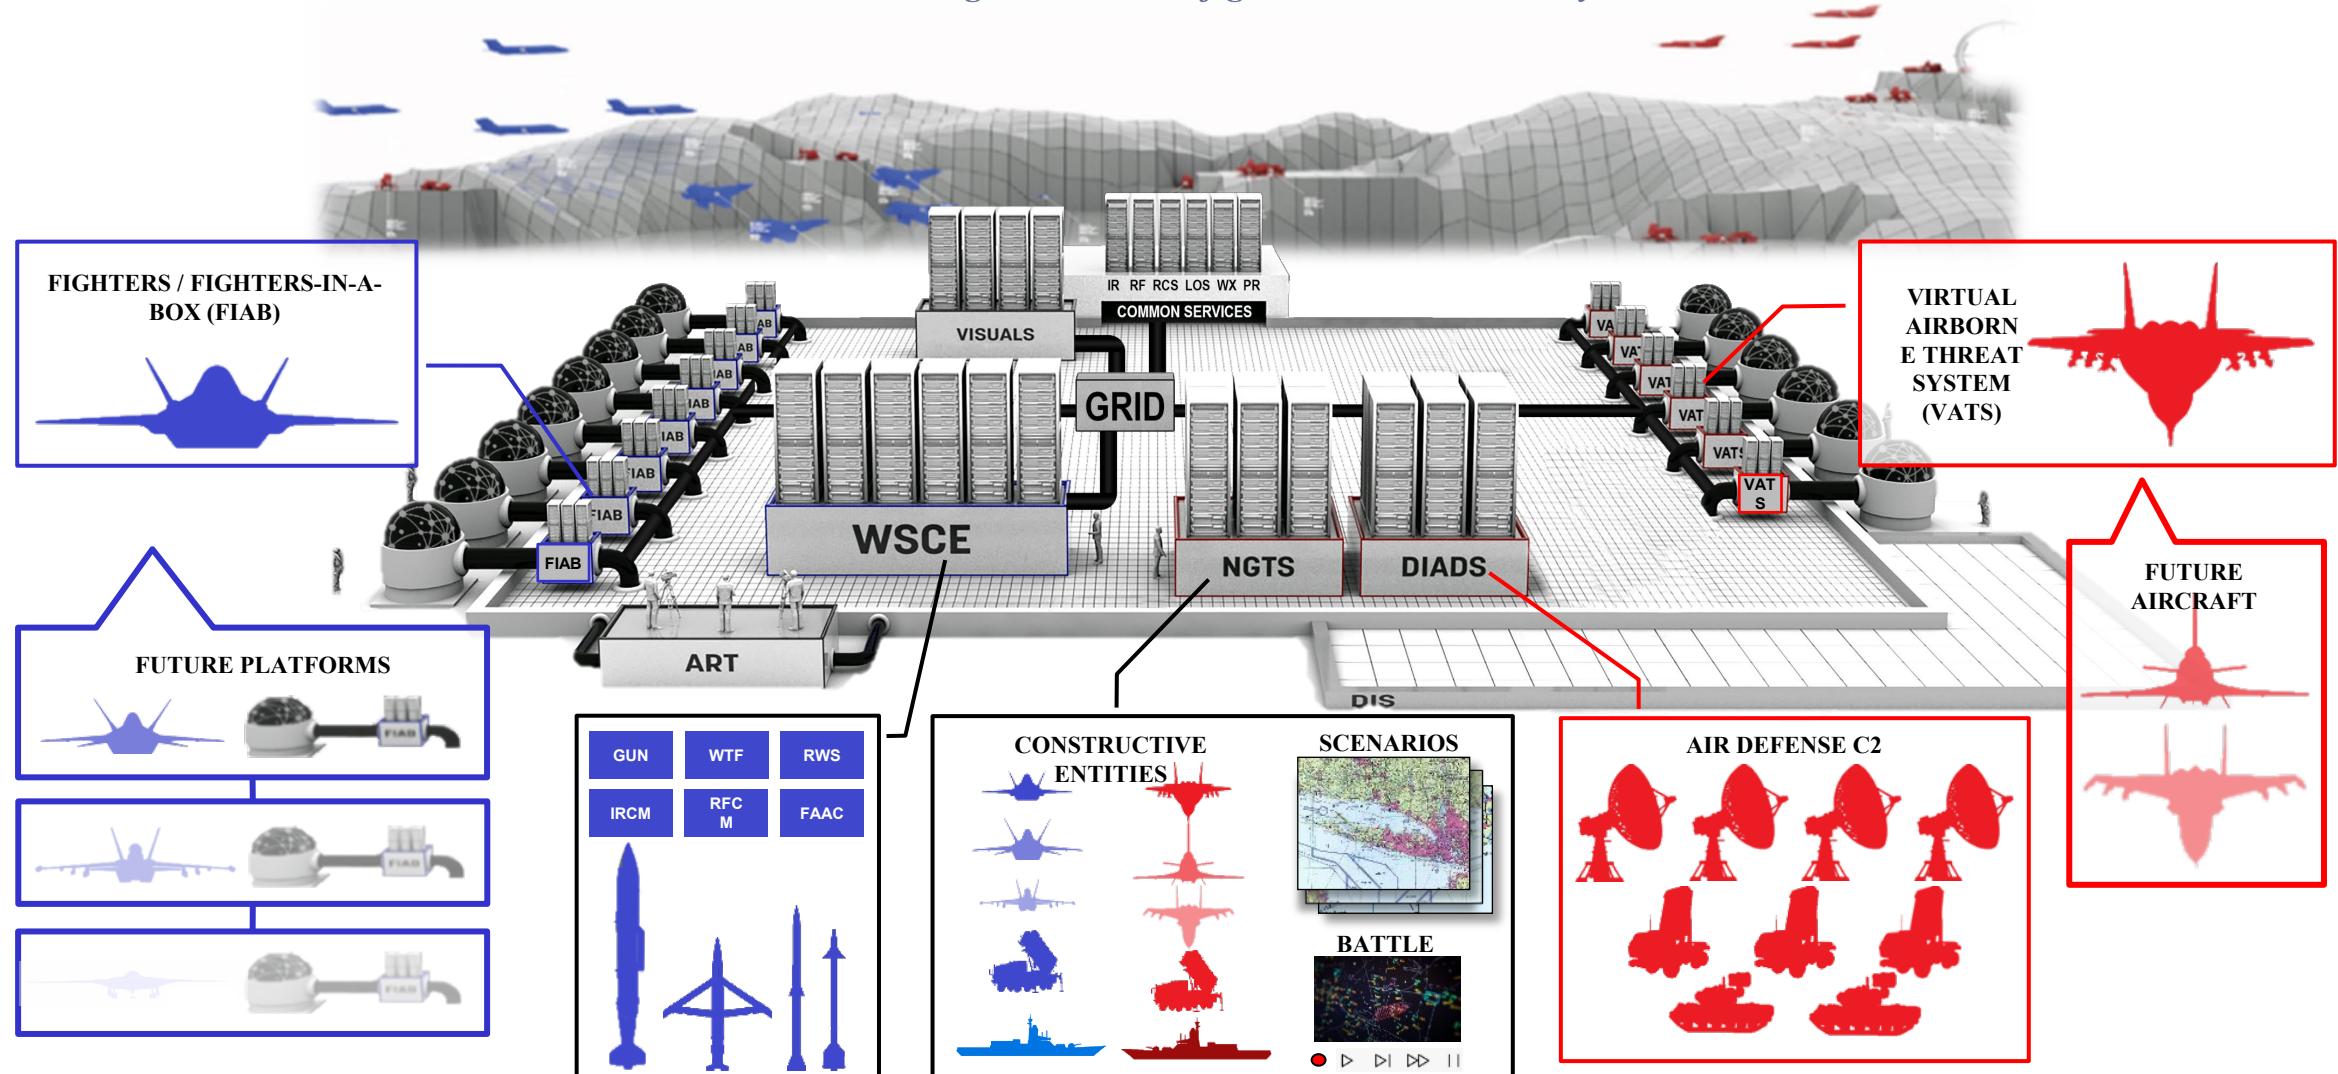

FY28

FY28

The "Digital Range"

AFLCMC... Providing What the Warfighter Needs When They Need It

ART - Analysis & Reporting Tool

WSCE - Weapon Server Common Environment

GRID - Global Reusable Interface Domain

NGTS - Next Generation Threat System

DIADS - Digital integrated Air Defense System

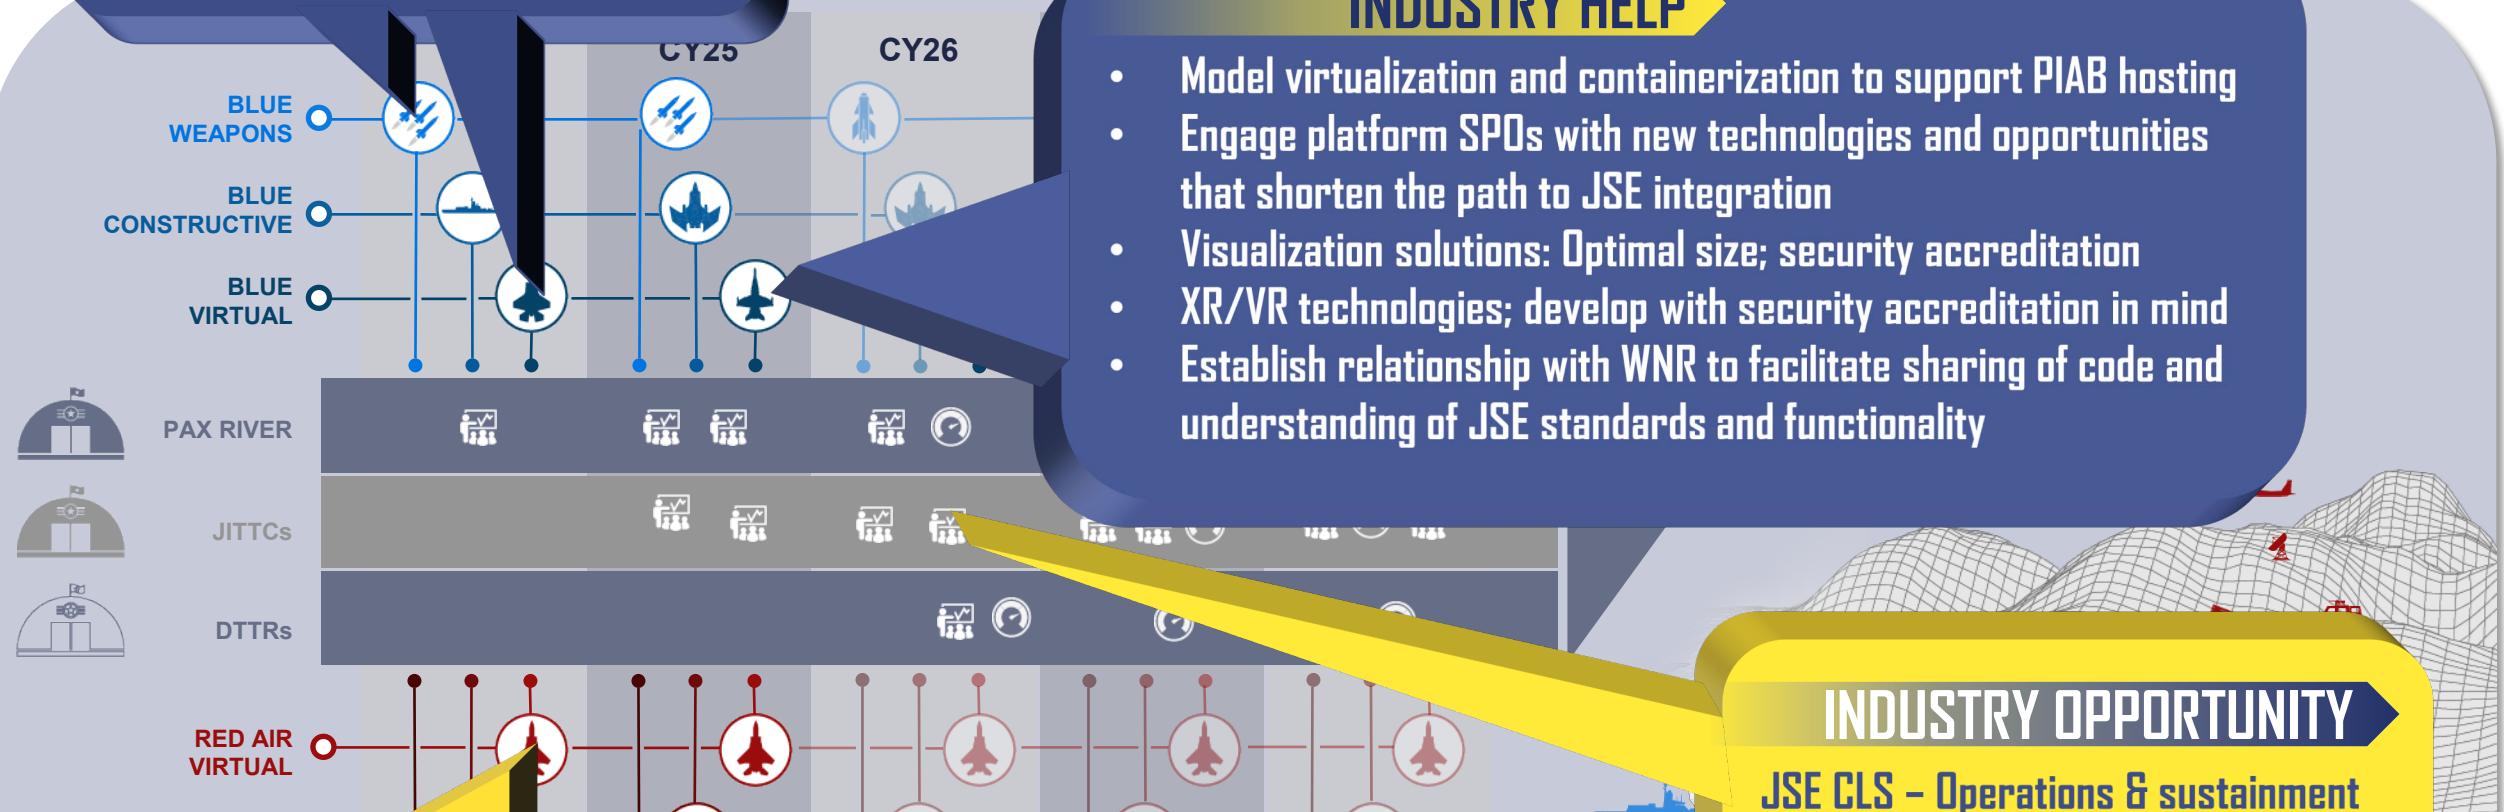

INDUSTRY HELP

Develop and deliver current platform, sensor, weapons models with urgency

JSE Conceptual Roadmap

LCMC... Providing What the Warfighter Needs When They Need It

INDUSTRY OPPORTUNITY

VAD0R2 Contract - Provides CI/CD capability for threat model integration on the Virtual Air Threat Solution (VATS) Operator-In-the-Loop virtual adversary air representation

- FOPR Release: Estimated Jan 2026

INDUSTRY HELP

- Model virtualization and containerization to support PIAB hosting
- Engage platform SPOs with new technologies and opportunities that shorten the path to JSE integration
- Visualization solutions: Optimal size; security accreditation
- XR/VR technologies; develop with security accreditation in mind
- Establish relationship with WNR to facilitate sharing of code and understanding of JSE standards and functionality

INDUSTRY OPPORTUNITY

JSE CLS - Operations & sustainment across JSE-enabled sites

- FOPR Release: Estimated late Summer 2026

KDAM C&I 2.0

Program Requirements

The Kدام C&I 2.0 users are represented by Air Education and Training Command (AETC), Air Combat Command (ACC), and Air Force Global Strike Command (AFGSC). In addition, US Special Operations Command (USSOCOM), Air Force Special Operations Command (AFSOC) are secondary users to AETC for specific activities at Kirtland AFB, NM. The Kدام C&I 2.0 mission is to provide the Formal Training Unit (FTU) schoolhouse operations for unique crew positions across five Mission Design Series (MDS) aircraft (CV-22, HC-130J, MC-130J, AC-130J, and UH-1N). This includes initial qualification training for AFSOC Special Operations Forces (SOF) aircrews, all training for ACC Personnel Recovery (PR) aircrews, all training for AFGSC Vertical Lift Aircrews in Nuclear Security Response, and all training for Convoy Support and AF District of Washington (AFDW) Vertical Lift Aircrews in Continuity of Government and Continuity of Operations. The baseline requirements are for aircrew instruction to include mission rehearsal training and mission sorties (initial/mission qualification, refresher, upgrade, and currency), and student services (i.e. update/maintain student records and scheduling).

C-130H AIRCREW TRAINING SYSTEMS

Program Requirements

The C-130 Aircrew Training System (ATS) program currently supports 5 sites and 9 primary Weapon System Trainers, a learning center and a technical support system center (TSSC). The C-130 Landing Gear Trainer (LGT) is a two-part training device used to train aircraft maintainers on the operations of the C-130H landing gear at Little Rock. The using organizations include AMC, AETC, AFRC, and ANG. The requirements include: Aircrew Instruction and training/100% Guaranteed Student throughput, Contractor Logistics Support, TSSC, and modifications (both sustainment and concurrency).

B-2 TRAINING SYSTEMS

Program Requirements

The B-2 Training System (TS) provides concurrent training for B-2 aircrews, maintainers, and weapons loaders. On-site CLS is available at a single location. The system includes 9 types of simulators 68 total devices, categorized as Aircrew Trainers (3 types, 12 devices, with 7 of the 12 also supporting maintenance); 5 types of Maintenance Trainers, 55 devices; and 1 Weapons Loading Trainer. AFGSC and AETC are the primary users. The contractor provides ongoing CLS and manages changes for concurrency and trainer-specific reliability and maintainability, with a 95% availability requirement.
