An outline of anticipated upcoming acquisition opportunities in BES for the next 18 months

OBJECTIVE

Enhance communications between members of Industry and the Business and Enterprise Systems (BES) Directorate

DISCLAIMER

The opportunities presented in the Smart Guide are provided solely for informational planning purposes and do not constitute a commitment by the government to award a contract. All information in the guide is preliminary, subject to change, and the Air Force makes no guarantees regarding the form, timing, or issuance of any future solicitations or contract actions (e.g., RFQs, RFPs, FOPRs, BPAs, Task Orders, etc.). Interested parties should not rely on information in the Smart Guide for details related to the Scope of Work, Value, Period of Performance, etc., when responding to official government solicitations. It remains the responsibility of interested parties to monitor appropriate sources for updates and to determine the availability, timing and/or location of released solicitations.

Base Maintenance (BMx) Family of Systems (FoS) Agile Services

Capability Delivery Manager:
Mr. Rick Phillips

Contracting Officer:
Capt Kenneth Cornwell and Ms. Cynthia Dodd

Program Description:

The BMx EoS currently includes but is not limited to the following programs: Integrated Maintenance Data System (IMDS) Central Database (CDB), IMDS Web Services (WS), Maintenance Scheduling Module (MSM), Precision Measurement Equipment Laboratory (PMEL) Automated Maintenance System (PAMS), Facilities Equipment Maintenance (FEM), and Field Maintenance Command and Control (FMxC2).

Objective:

Deliver comprehensive Technical sustainment and Agile software development services for the Base Maintenance (BMx) Family of Systems (FoS). These services are designed to facilitate timely, deficiency-free system updates, evolve capabilities by providing Level III help desk support, software maintenance and modification, and cloud environment adaptation. The overall objective is to ensure Base Mx responds to new requirements and incorporates additional logistics capabilities through an innovative and adaptive Agile process.

Also provide Subject Matter Expert (SME) support to address the dynamic functional demands of the Base Maintenance (BMx) Family of Systems (FoS). This includes offering Level II help desk services for problem identification and resolution, as well as evaluating, documenting, and testing functional solutions to restore system functionality. The primary goal is to ensure Base MX's performance and productivity are enhanced to meet user needs within an Agile framework.

Scope:

The scope of this requirement encompasses the full range of technical and functional analysis services required for the life cycle management of the BMx FoS. The BMx FoS Agile Services shall be responsible for all activities related to agile development, enhancement, sustainment, and operational support. Sustainment activities include corrective, perfective, adaptive, preventive, and predictive maintenance for all systems and applications.

Anticipated Acquisition Approach:

16.505 Fair Opportunity Selection - SBEAS Competitive

Anticipated Period of Performance:

January 2027 – January 2032 (One-year base period, plus four 1-year option periods)

Anticipated FOPR Release Quarter:

3QFY26

Historical Range:

\$62M – \$69M

NAICS Code:

541511 – Custom Computer Programming Services

Anticipated Small Business Set Aside:

Yes

Incumbent Contract:

Zigabyte Corporation; FA8771-20-D-0019 (Order FA8771-22-F-0018);
Citizant, Inc; FA8771-20-D-0003 (FA8771-21-F-G043)

Enterprise Logistics
Systems

Civil Engineer Systems

Material Leader:
Lt Col Tyler Hough

Contracting Officer:
Ms. Cynthia Dodd

Program Description:

Civil Engineer (CE) Systems division provides the specialized IT infrastructure necessary to manage base operations and mission readiness. The Automated Civil Engineering System Family of Systems (ACES FoS), including ARIS and FES-IMS, facilitates readiness tracking, emergency dispatch, and contingency decision-making. NexGen IT acts as the primary modernization platform, providing real-time strategic data to replace legacy processes. Environmental and safety compliance is managed through EESOH-MIS, while GEOMAP delivers enterprise Geographic Information System (GIS) capabilities for facility sustainment and geospatial analysis.

Objective:

This FFP contract will provide comprehensive technical and program management support to modernize, sustain, and secure the Air Force CE Systems (ACES FoS, NexGen IT, EESOH-MIS, GEOMAP).

Scope:

The Contractor will provide a pool of skilled resources with the appropriate certifications and experience to facilitate program management office (PMO) support to the CE Systems division in the areas of Project Management, Systems Engineering, Budget Analysis, Configuration Management, and Test Engineering, and Geospatial Analysis.

Anticipated Acquisition Approach/Vehicle:

RFO 16.202 - FFP, RFO 6.103-5 – 8(a) Competitive

Anticipated Period of Performance:

April 2027 – April 2032 (One-year base period, plus four, 1-year option periods)

Anticipated FOPR Release Date:

3QFY26

Historical Range:

\$31M – \$35M

NAICS Code:

541519 – Other Computer Related Services

Anticipated Small Business Set Aside:

Yes

Incumbent Contract:

Dine, LLC; FA8771-22-C-0007

Depot Maintenance Systems Integration (DMSI) / Spectrum System Development Architecture (SSDA)

Program Manager:
Mr. Adam Crouch

Contracting Officer:
Mr. Antonio Ayubi

Program Description:

The SSDA provides a common and integrated architecture framework that is the backbone of DMSI applications. DMSI is a suite of six (6) software applications integrated with a single database supporting Depot Maintenance operations at the three (3) Air Logistics Complexes (ALCs), Hill AFB, UT; Tinker AFB, OK; and Robins AFB, GA. SSDA supports approximately 12,000 users. The six applications are:

- G005M- Depot Maintenance Material Support System (DMMSS)
- E046B - AFMC Labor Standards Data System (ALSDS)
- G337 - Inventory Tracking System (ITS); G097 - Programmed Depot Maintenance Scheduling System (PDMSS)
- G402A - Exchangeable Production System (EPS)
- G004L - Job Order Master Production System (JOPMS)

These applications also integrate into a common database (Q302), the Depot Maintenance Consolidated Operational Database (DMCOB).

Objective:

Provide continuous sustainment capabilities to the SSDA until program can be decommissioned (FY29).

Scope:

The current contract serves to provide the framework and architecture for DMSI systems PDMSS, ALSDS, JOPMS, EPS, DMMSS, and ITS. Support is sustainment of the application to allow for alignment with DoW mandates as well as corrective, perfective, adaptive and preventive sustainment.

Anticipated Acquisition Approach:

Sole Source – FAR 6.302

Anticipated Period of Performance:

January 2027 – July 2029 (One-year base period, plus one 1-year option period, and one six-month option period)

Anticipated RFP Release Quarter:

4QFY26

Historical Range:

\$5M - \$6M

NAICS Code:

541511 – Custom Computer Programming Services

Anticipated Small Business Set Aside:

No

Incumbent Contract:

Empower AI; (FA8770-21-CB-001)

**Capability Delivery Manager:
Mr. Maurice Rollins**

**Contracting Officer:
Mr. Adam Golden**

Program Description:

ILS-S provides standard automated processes that enable base level activities to perform supply/accounting business in terms of management of orders, issues, turn-ins, shipments and disposal actions. ILS-S also performs base level asset visibility, including receipt, stock, store, and inventory accountability. ILS-S supports Active Duty, Guard and Reserve Force; available 365x24x7 with 18,000 users at 252 sites; 46 interfaces.

Objective:

The overall purpose and objective of this contract is to provide daily operations and sustainment support for the Integrated Logistics Systems – Supply (ILS-S).

Scope:

The contractor will provide Technical Operational Support to the ILS-S Program by delivering agile and flexible IT services for the LogIT system, including its consolidation, integration, and sustainment.

Anticipated Acquisition Approach/Vehicle:

Small Business Enterprise Applications Solutions (SBEAS)

Anticipated Period of Performance:

August 2027 – May 2032 (One 9-month base period, plus four 1-year option periods)

Anticipated FOPR Release Date:

3QFY26

Historical Range:

\$25M – \$35M

NAICS Code:

541511 - Custom Computer Programming Services

Anticipated Small Business Set Aside:

Yes

Incumbent Contract:

Absolute Strategic Technologies, LLC; FA8771-20-D-0005

Mission Support Systems

Automated Contract Preparation System (ACPS)

Program Manager:
Mr. Esmil Feliz

Contracting Officer:
Mr. Eric Brown

Program Description:

ACPS provides contract writing and procurement management support to over 1,200 users in logistics contracting communities across AFMC (Hill, Robins, Tinker). The current contract effort includes the acquisition of functional and technical expertise for the maintenance of ACPS. The aforementioned tasks are related to the following items: configuration management, system sustainment, and system documentation.

Objective:

To secure a follow-on effort that will continue to support the contracting communities located at Hill, Tinker, and Robins AFB by maintaining the ACPS program. Ongoing support will continue until ACPS is subsumed by CON-IT.

Scope:

The scope requires the contractor to provide all resources and qualified personnel to deliver agile program management in maintaining system readiness, user support, and necessary operational updates for the existing ACPS program. Additionally, the contractor will be tasked with support of data migration effort that is necessary to facilitate the eventual subsumption of contracts into CON-IT.

Anticipated Acquisition Approach/Vehicle:

To Be Determined (TBD)

Anticipated Period of Performance:

March 2027 – March 2029 (One-year base period, plus one 1-year option period)

Anticipated FOPR Release Date:

4QFY26

Historical Range:

~ \$4M – \$5M

NAICS Code:

541511 – Custom Computer Programming Services

Anticipated Small Business Set Aside:

Yes

Incumbent Contract:

Mission Support Systems

Global Force Management – Data Initiative (GFM-DI)

**Capability Delivery Manager:
2Lt Joseph Wright**

**Contracting Officer:
Ms. Kelsey Rand**

Program Description:

The Global Force Management Data Initiative (GFM-DI) is a Joint Staff and OSD program that standardizes DAF force structure data to make it visible, accessible, and understandable for critical planning functions. The Department of the Air Force Organizational Server (DAFOS) is the core of this initiative, consuming, validating, and transforming data from authoritative Air Force sources to provide the Joint Staff with a comprehensive view of the entire force structure for effective war and contingency planning.

Objective:

The objective of this contract is to acquire support services to provide comprehensive software development and technical support services to sustain, enhance, and optimize the DAFOS system. This will be achieved through the application of Agile methodologies and continuous process improvement to iteratively deliver high-quality, secure, and maintainable software that provides maximum business value to the government.

Scope:

The scope includes providing all resources and qualified personnel to deliver agile program management, secure software development, robust automated testing, technical documentation, and DevSecOps engineering. The contractor will manage the full software development lifecycle, including maintaining the automated CI/CD pipeline, implementing Infrastructure as Code (IaC), integrating automated security scanning, and ensuring all deliverables meet stringent DoW and Air Force security and compliance standards.

Anticipated Acquisition Approach/Vehicle:

RFO 16.5 – SBEAS

Anticipated Period of Performance:

November 2026 – November 2029 (One-year base period, plus two 1-year option periods)

Anticipated FOPR Release Date:

3QFY26

Historical Range:

~ \$3.5M – \$8.5M

NAICS Code:

541511 – Custom Computer Programming Services

Anticipated Small Business Set Aside:

Yes

Incumbent Contract:

Appdiction Studio LLC, FA877122C0011

Mission Support Systems

Integrated Budget Documentation & Execution System (IDECS)

Capability Delivery Manager:
Ms. Jessica Shihady

Contracting Officer:
Mr. Eric Brown

Program Description:

IDECS automates business processes supporting AF budget development cycles in the Planning, Programming, Budgeting and Execution (PPBE) System. IDECS supports authoring, review, consolidation, and publication of investment budget justification documentation for the annual Office of the Secretary of Defense (OSD). Program Budget Review (PBR) and the President's Budget (PB) submission to Congress.

- Allows USAF field users at Program Offices to enter detailed budget requirements and justifications ensuring warfighters have what they need, where they need it, when they need it and at the most reasonable cost possible to U S taxpayers.
- Submits budget information to headquarters-level Program Element Monitors and Capability Support Offices to ensure AF leadership has the best logistics information tied to the most accurate financial information possible for making critical trade-off decisions. Facilitates headquarters-level Appropriation Managers validation that requirements and justifications are aligned with AF and DoW priorities, policies, and positions by providing an efficient and effective coordination workflow to aid in decision-making at all appropriate levels.

Objective:

Operations, Maintenance and Sustainment Support.

Scope:

Provide programmatic, functional and both general and specialized technical support to ensure publication, training, delivery, operation and management, maintenance, sustainment and release of IDECS AF Budget justification materials to intended recipients.

Anticipated Acquisition Approach:

FAR 6.302-1

Anticipated Period of Performance:

September 2026 – February 2029

Anticipated FOPR Release Date:

3QFY26

Historical Range:

Mission Support Systems

Medical Systems – AFMOWAP/MRDSS

Program Manager:
Mr. Darrius Johnson and Mr. Keith Engholm

Contracting Officer:
Ms. Catrina Lewis

Program Description:

The Medical Systems and Criminal Investigation Branch includes two major programs that support Air Force medical readiness: the Medical Readiness Decision Support System (MRDSS) and the Air Force Medical Omnibus Web Application Pool (AFMOWAP). MRDSS is a system that enables the USAF medical community to monitor personnel, training, and equipment readiness while providing global visibility of wartime materiel and personnel to support fully deployable capabilities. The AFMOWAP is a family of applications used by Air Force medical staff to track and manage waivers, flying personnel physical examinations, non-weaponized radioactive materials, and medical manpower.

Objective:

Obtain functional and technical solutions to sustain, maintain, and provide lifecycle services using agile methodology.

Scope:

The scope requires the contractor to provide all resources and qualified personnel to deliver agile program management, secure software development, robust automated testing, technical documentation, and DevSecOps engineering. The contractor will manage the full software development lifecycle, including maintaining the automated CI/CD pipeline, implementing Infrastructure as Code (IaC), integrating automated security scanning, and ensuring all deliverables meet stringent DoW and Air Force security and compliance standards.

Anticipated Acquisition Approach/Vehicle:

Technical Services

Enterprise Resource Planning Common Services (ERP CS)

**Capability Delivery Manager:
Mr. Rene' Williams**

**Contracting Officer:
Ms. Amanda Stull**

Program Description:

Enterprise Resource Planning Common Services (ERP CS) is the Air Force evolution to standardized cloud infrastructure, application support services, and cyber security solutions, for Air Force ERP mission applications. The program was established by 2016 United States Under Secretary of the Air Force (USECAF) and Vice Chief of Staff of the Air Force (VCSAF). Common Services has adopted SAFe Agile practices, provides standardization of cloud hosting environments, and has established a layered security approach, delivering in-depth cyber security to Mission Partners and ensuring secured data.

Objective:

Our objective is to enhance and sustain ERP CS capabilities by developing innovative solutions and integrating upgrades. Built on Air Force Cloud One's Oracle Cloud Infrastructure (OCI), ERP CS supports key programs, including Maintenance, Repair, and Overhaul (MRO), Air Force Integrated Personnel and Pay System (AFIPPS), and Defense Enterprise Accounting and Management System (DEAMS).

Scope:

The contractor shall provide IT services for a wide range of tasks, adhering to Government-mandated standards and industry and Government best business practices in environment development, testing, integration, cybersecurity, maintenance and sustainment of ERP CS capabilities and services, and transition management.

Anticipated Acquisition Approach/Vehicle:

Financial Systems

Program Budget & Enterprise System (PBES)

**Capability Delivery Manager:
Mr. Robert (Tony) Nicholson**

**Contracting Officer:
Mrs. Amanda Stull**

Program Description:

The Program Budget & Enterprise System (PBES) leverages Commercial Off-The-Shelf (COTS) IT enterprise solutions configured to satisfy the specific needs and business processes of the Department of the Air Force’s Planning, Programming, Budgeting (PPB) communities.

Objective:

To provide a streamlined, cloud-hosted financial management solution that enables the Air Force to formulate, enact, and execute its budget through Agile software development. The objective is to maintain system reliability while continuously delivering enhanced capabilities via a DevSecOps pipeline to ensure auditability and data-driven decision-making for the PBES user community.

Scope:

System Integrator (SI) support for the Program and Budget Enterprise System (PBES). Comprehensive SI support needed to ensure the smooth operation, maintenance, and enhancement of PBES to meet the needs of the Functional Management Office (FMO), Program Management Office (PMO), and Department of the Air Force Planning, Programming and Budgeting (PPB) user community.

Services Management
Division

Cisco Global Enterprise Modernization Software and Support (GEMSS) Enterprise Agreement (EA) II

Capability Delivery Manager:
Ms. Sharon Nettles

Contracting Officer:
Ms. Carmelyn Anne L.G. Bryan, DISA/DITCO

Program Description:

Global Enterprise Modernization Software and Support (GEMSS) Enterprise Agreement (EA) II provides maintenance and support of the Department of the Air Force's (DAF) global enterprise environment of Cisco equipment. This effort would also include procurement of a COTS Network Access Control (NAC) solution in support of DoW Comply to Connect (C2C) requirements in addition to COTS on-premise calling Voice over Internet Protocol (VoIP) license subscriptions in support of the DAF's (VoIP) telecommunications equipment.

Objective:

Obtain a Cisco EA bundle that will provide software, Smart Net (SNTC) and DNA Advantage software coverage inclusive of continuous (24 hours a day, 7 days a week, and 365 days a year) maintenance and SmartNet technical support for the DAF for Cisco brand name hardware and software IT assets.

Scope:

This requirement is for 100 percent DAF enterprise SNTC support, SWSS software maintenance coverage and unlimited Cisco Digital Network Architecture (DNA) Advantage subscriptions for DAF owned Cisco assets, and associated implementation, delivery and management services inclusive of High Touch Technical Services (HTTS), High Touch Operations Management (HTOM), remote information technology (IT) inventory management support, and engineering—all of the services provided is known as the Cisco EA Bundle. In addition, this requirement is for Cisco Identity Services Engine (ISE) deployments in the effort to meet mandated C2C requirements including integration with Government Furnished Equipment (GFE) provided third party logging tools, as well as for VoIP phone license subscription support.

Anticipated Acquisition Approach/Vehicle:

Program Execution Group

GB Cloud Acceleration Services (GBCAS)

Program Manager:
Mr. Eric Amissah

Contracting Officer:
Mr. Christopher Artis

Program Description:

The Air Force (AF) will continue moving selected business systems from legacy hosting environments to the procured cloud framework. Supporting PEO BES agile requirements, this IDIQ utilizes services to acquire and then grow necessary competencies to effectively migrate and integrate cloud offerings essential to continue and advance the AF automation mission. In addition, this IDIQ may support continuous sustainment and implementation of evolving efforts to include advancements in Application Programming Interfaces (APIs), Artificial Intelligence (AI), Robotic Process Automations (RPA), and other innovative cloud support services.

Objective:

This contract will support PEO BES and related business system programs on their Cloud and Agile journeys, allowing a respective Program Office or App to acquire cloud related support services.

Scope:

The Contractor will provide a pool of skilled resources with the appropriate cloud specialization(s) to facilitate cloud administrative support for BES programs hosted in cloud environments, while coordinating activities with PMO and a host of other necessary personnel. The services covered under this contract include the range of skill sets required to migrate, sustain and support an application in a cloud environment, as well as, to manage the application’s cloud framework. The implementation includes native cloud components, cloud deployment pipeline, and automation methods comprising infrastructure as code implementation. Each task order will address specific requirements, project scheduling, and other related performance criteria, as applicable, in accordance with AF and DOD standards.
