USAF & FMS

Production/Modification Efforts Giving Eagle the Edge to 2040+

- Radar
- Computer upgrades
- Radio Upgrades
- Eagle Passive Active Warning Survivability System (EPAWSS)
- Resilient-Embedded GPS/Inertial Navigation System (R-EGI)
- Mission planning updates
- Operational Flight Program (OFP) – Agile s/w development
- F-15EX Procurement, Production and Fielding
- FMS Production and Modernization

F-15 C/D

F-15 E

F-15 EX

Sustainment Activities

- Organic Depots
- Aircraft Structural Integrity Program (ASIP)
- Sustainment support services, CLS, Repair & Return Services, Supply Services (personnel/parts), and in-country intermediate maintenance capability

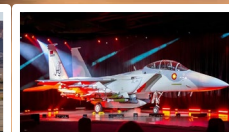

Korea

Israel

Saudi Arabia

Qatar

Japan

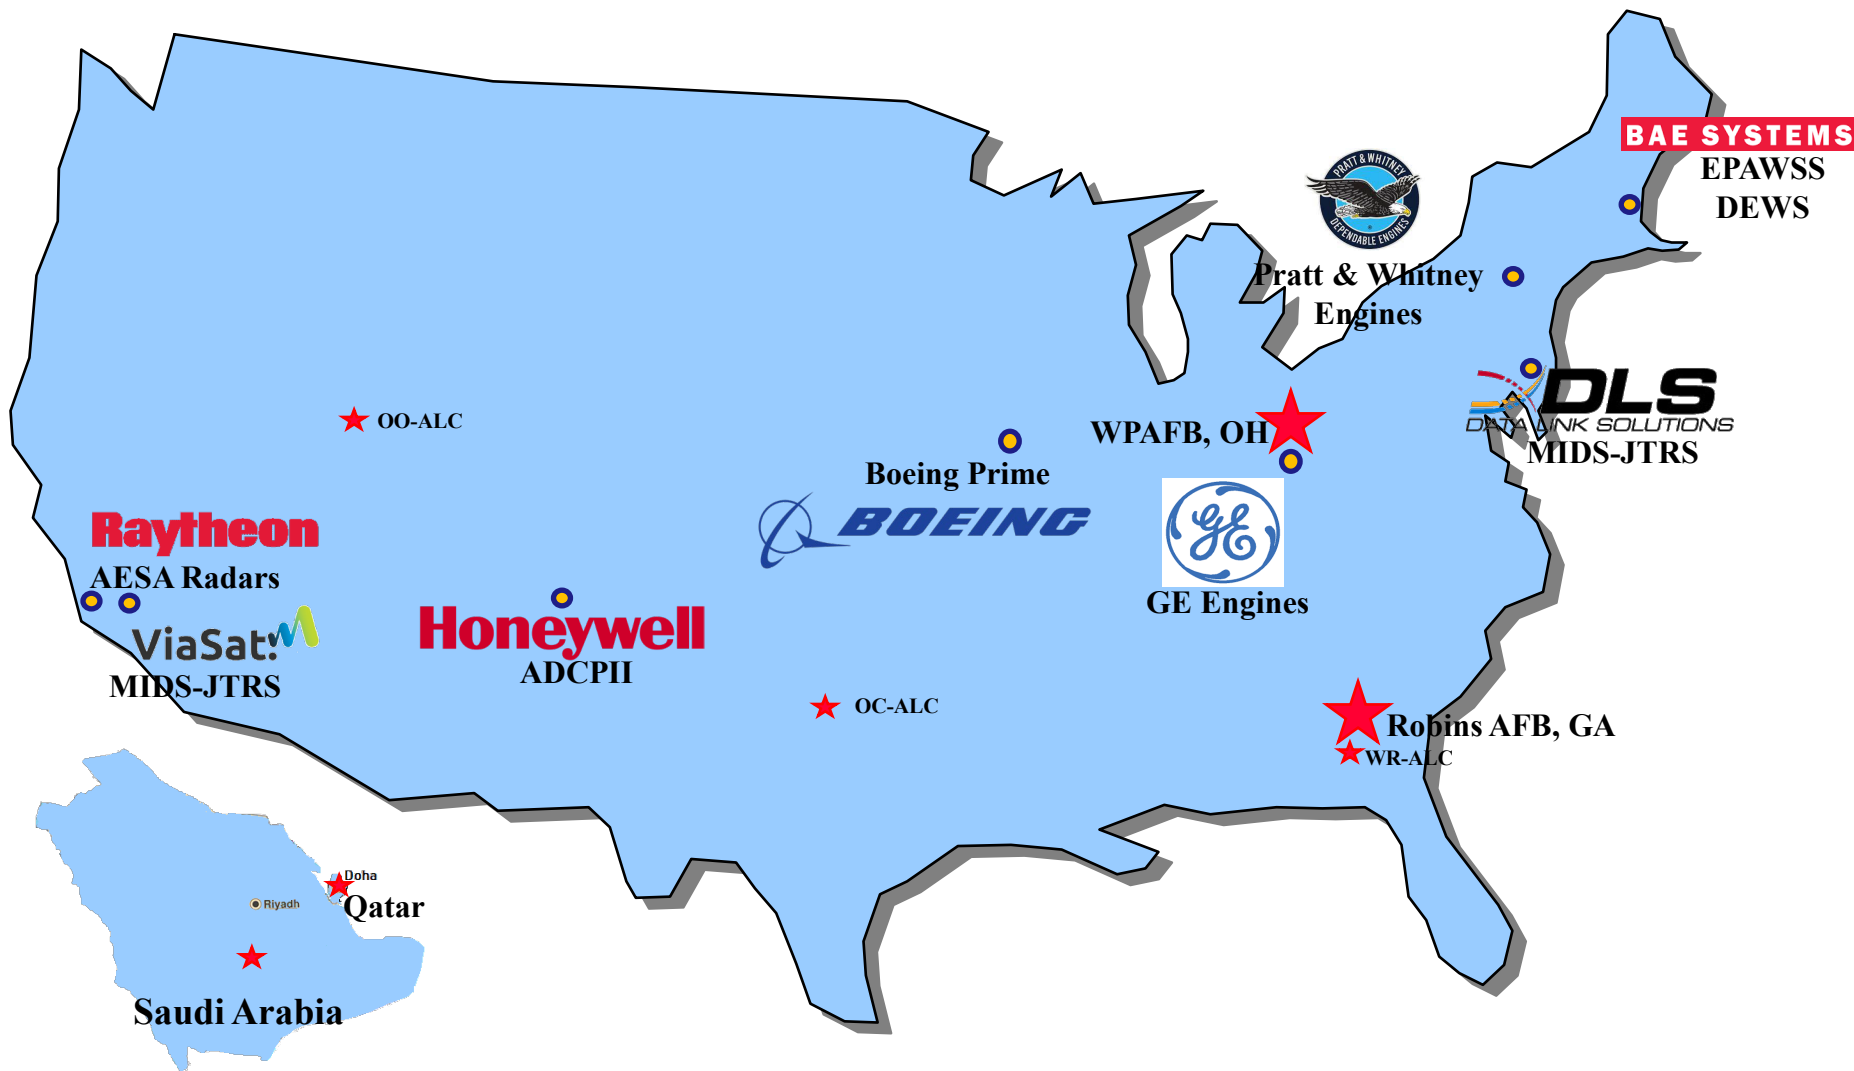

Singapore

F-15 Division – Where We Are

Providing the warfighters mission-ready F-15s

Agile Mission Suite

Government Reference Architecture (AMS GRA)

Providing the warfighters mission-ready F-15s

- Partnered with ADO ASE and C3BM to implement an AMS GRA compliant with SOSA 2.0 aligned Multi-Function Processor integrated into F-15 platform
- Will contribute to and leverage the marketplace for future mission system capabilities
- Ability to rapidly field new combat capabilities in strategically relevant timelines

Future Requirements

Providing the warfighters mission-ready F-15s

- Current focus is on integrating common developmental hardware into the F-15
 - Boeing (F-15 Original Equipment Manufacturer) fills role of prime integrator
- Program office continues to evaluate every opportunity to expand vendor participation
 - As opportunities are identified, market research requests for information will be posted on sam.gov
 - Present a combat-ready F-15 enterprise, strengthened by a resilient and efficient supply system.
 - Identify and pursue opportunities to streamline and reduce complexity in DMS-related issues

Providing the warfighters mission-ready F-15s
